A CENTENNIAL CELEBRATION

[illegible]

man of the highest order of character and bearing.

DEATH OF MR. G. KNOX.

Senate.—It is with great pain that I have here to mention the death of Mr. George Knox, the Secretary to the Senate. He had just announced so lately on our last commemoration. We were all heartily welcomed him then as one who gave promise of becoming a particularly valuable accession; and the shortness of time that he was with us sufficed to prove that our expectations were not groundless. He was a man of high attainments in the discharge of his duties; and it fortunately happened that he was with us whilst establishing our new Curriculum in the ARTS, and thus had a special opportunity for bringing his own qualifications into valuable use. In reference to his services to the University, I have already said much in this connection. In this colony, Mr. George Knox received his earlier education at the Sydney Grammar School, and in this University. In the former he gained the Baiting Scholarship.

shall have a deliberative as well as a casting
7. All resolutions of convocation shall be signed by
president, and shall be laid by the register before
the members at its next meeting. 8. All members
attending any such meeting shall appear in the habit
of their degree. After these by-laws had received
the Governor's assent, it was further resolved by the Senate
that the President should be empowered to "vice-presi-
dent, be authorised to summon a meeting of the
for the purpose of communicating the by-laws formally
to the members," the intention being that an expedition
be given of the effect of the by-laws, and the legal
rights of the members, that should arise in the course
of future meetings, and for the course of proceedings.
action has yet been taken on this resolution, but the
convocation will be summoned for the preliminary
proceedings on an evening of the 10th inst. assuming, the by-
laws are not yet known. In the mean time, the

received medical degrees from this University. No institution or school within the colony was established under that Act: nor was there any such school of medicine in the colony until the year 1883. In the meantime, however, the possibility of establishment of such a school on the London model in this University, was kept in view by myself, probably many others, and when, in 1874, the Government sanctioned the scheme, the University and there was a suggestion that it should be held a site within the University grounds for a building to be purchased in the same year, and was called to the terms of that Act, the University in which it was provided that if any gifts in trust were declared in that grant should lapse by reason of failure of any bodies in whose favour the trusts had

I am happy to say that on this occasion, every past year of my presidency, I have the opportunity to announce some very valuable beneficiaries. The first group of beneficiaries are the students of the school, who are the most deserving. I have the pleasure of announcing the following students who have been selected for the 1987-1988 school year. The death of the chief Hawkes Bay is reported from New Zealand. He was a staunch friend of the Europeans during the Maori war.

A TELEGRAM from Auckland (N. Z.) states that the South British Insurance Company will pay a dividend for the year equal to 8 per cent.

It is reported that there are signs of a great mining revival in Auckland.

A man has received a verdict for £200 damages against Alfred Brunton, an evangelist preacher, in Dunedin (N. Z.), who was charged with libel by the wife of a bank clerk named Daldryill.

LORD CARRINGTON'S speech at the Com-

memoration on Saturday was, though brief, suggestive, and its interest extended beyond the limits which might have been imposed by the circumstances under which it was delivered. Colonial Governors do not find many opportunities for addressing the public, but occasionally it is found convenient to make them. In this case his EXCELLENCY seems to have considered it expedient to travel outside the range of questions of merely academic interest for the purpose of saying a few words about his own position and the duties of his office, and of indicating the conclusion at which he has arrived upon the Chinese question. In view of the circumstances of the times, and certain phases of contemporary opinion, we cannot say that these digressions were inopportune.

The position of a colonial Governor is not so completely defined by the Royal instructions

under which he acts as to leave no room for a difference of view between successive occupants of the office as to the spirit and manner in which its duties should be discharged, or the extent of what may be termed its extra-official obligations. Upon such points there may be a breadth of view or a narrowness, without straining the meaning or disregarding the letter of the instructions which must be obeyed. It is, however, far from being a matter of indifference whether a Governor takes a broad view of his functions or a narrow one; and it is satisfactory to know not only from Lord CARRINGTON's words at the University, but from the uniform tenor of his action here, that he has no tendency to err on the latter side. He holds that his position "is not simply that of an Imperial official, representing England and England

views in Australia." The GOVERNOR is the representative here of Imperial authority; he is the medium of communication between the Crown and the local Legislature; through him the views of the Imperial Government are made known. But there is another side to the question. The status of the Agent-General in London has within the last few years been greatly raised. They deal directly and frequently with the Im-

parial authorities. They convey to them the ideas of the Governments they represent with a freedom that would not have been thought of 20 years ago. But, notwithstanding these changes or developments, the GOVERNOR still remains the chosen confidential representative of the Crown in the colony, and, as such, a trusted medium of communication for the representation of colonial ideas and colonial interests at the

centre of the Empire. A colonial Ministry may submit a case as it is seen simply from the colonial standpoint; a Governor must look upon it as an Imperial official, and therefore from a different point of view. When representations are sent from both sources, each has a value of its own. But it is a matter of no slight importance that the GOVERNOR, whilst faithful to the Imperial service, and enabled by his attachment to it

to see more of a question than can always be discerned by those who may study only one side, should be also in close rapport with the interests of the colony, and in sympathy, so far as loyalty to his trust will permit, with the sentiments, aspirations, and claims of its people. Lord CARRINGTON regards it as his duty "to the best of his power to strengthen the cordial relations between the colonies and the mother land."

country," and as the maintenance of colonial relations between communities, as between individuals, is generally dependent upon a clear understanding between them, his success in the performance of that duty can hardly fail to be promoted by the influence of a sympathetic appreciation of colonial opinion and desire upon the performance of what may be called his intermediary work.

Upon no question of immediate interest is it more desirable—indeed more necessary—that the Governor's representations to the Imperial authorities should be marked by clearness of statement and a sympathetic understanding of the feeling of the country than upon the question of Chinese immigration into Australia. For years that are past this was a question fairly open to debate. There were prophets of evil, and there were unbelievers

who held at any rate that the danger was not at hand. There have been fluctuations of policy—the imposition of restrictions, their repeal, and their re-imposition. The question has now reached another stage. When Lord CARRINGTON said, "On the Chinese question I believe Australia has come to a unanimous decision," he made a statement which, broadly speaking, is beyond dispute. The question is one of several aspects—the

Industrial, the sanitary, the political, and the racial. It excites different thoughts and feelings in different minds; and to those who consider it in these varying lights, different forms of action may commend themselves. But out of this diversity comes a consensus of judgment, that Chinese immigration must be made to cease as a source of danger to the community, or to cease altogether unless the element of danger can be removed.

eliminated. Otherwise there must be an absolute exclusion of the possibility of a powerful invasion of the territory; and if that end cannot be attained by measures short of general prohibition, general prohibition must be resorted to. When Lord CAMERON recognises the fact that Australia has come to a unanimous decision upon the Chinese question, that is the decision which has forced itself upon his mind; and it is all the more true because clearly and

well that he both sees the case clearly and is ready (as his remarks indicate) to state it to the Imperial authorities with the clearness, the fulness, and the force of one who understands and rightly appreciates the strength of Australian feeling upon it.

But none the less is it one of the
character and importance. That point has
been forced into prominence by the action of

the Chinese Minister in London; and one of the most encouraging signs of the times is the readiness with which the Australian Governments have learned the lesson he has taught them. The question is *de facto* a question affecting the Empire; and for that reason it is essential that the urgency of its domestic interest to us should be made known, so that the whole weight and influence of our side in procuring its settlement. We do not care to talk about the foreign policy of Australia yet. What we need is that the foreign policy of the Empire should be governed by an intelligent perception and a hearty recognition of Australian interests.

The connection between his EXCELLENCY's remarks to the undergraduates and this matter of high State policy is sufficiently evident. The discussion of few questions of public interest has been more frequently disfigured by rant and claptrap. The signs of the times warn us that controversies are at hand in these colonies which will put to the severest test not only the knowledge and ability of our public men, but their possession of those qualifications of tact and temper without which so public controversy can be conducted with credit. It is a common, and it should not be a mistaken, assumption that the young men who are passing through our Universities are preparing themselves to take part in our public affairs. We need the introduction of new blood—of men who will not enter without preparation in every sense. The University will not have been established in vain if, through the influence of its training, an elevated tone and evidence of refinement should come to be discernible amidst the struggles of public life, and men should learn, in his EXCELLENCY's words, to differ without discourtesy, to debate without violence of language, and, whilst holding the strongest convictions, to retain a chivalrous respect for opponents. Our students would do well to keep this ideal standard in view, and to profit by the warnings that have been set before them in real life.

This year's University commemoration is remarkable for at least one thing. It was the shortest that has been known for many years. This was chiefly owing to the good judgment of the CHANCELLOR in not orally delivering his long address, and to the fact that the students were not seized with an overmastering desire to make their voices heard in jest and song too often. The result was that the large audience that had gathered about it which is necessary to competition. At least a University commemoration is not a very imposing ceremony, but it still has always an interest which can only be explained by the fact that it is an occasion where the young come to receive their rewards for intellectual labour, and to be announced to the world as those who are striving for, or who have obtained, that educational commission which should send them out into life's battle prepared to pursue the paths of scholarship, and, at least, with the culture of true gentlemen. The occasion is interesting to the old because they have sympathies for the young who stand on the verge of the struggle, and it is of singular importance to those who, having sons or daughters among the students, take pride in their advancement and their collegiate status. To the thinking public, too, the time is one of import, because we have a right to expect that from our universities will come those who will bring good blood into our political life, who will maintain a chivalrous standard of morality and culture in society, and who will carry into the sphere of commerce the principles of honour and integrity which it is supposed a liberal education ought to go far to strengthen. Unfortunately universities do not always send out the best of the world's workers, but in general the work done is good; and though some who are not acquainted with University life may be inclined to look upon the frolics and merriment that characterise the exercises of Commemoration Day as "larkishness," still we may well be sure that behind this unchecked buoyancy there is the backbone of good sense and manly ambition.

Sir WILLIAM MANNING's address was full of matter for comment, and contained references to proposed and accomplished changes in the University which will materially affect its work and its influence. The Arts Curriculum during the past year has undergone revision, and the principle has been established that students may after the first year choose one of a group of subjects which are somewhat akin, and so take their degree by examination in branches of study which they like the best. This is a move in the right direction. The English universities have recognised the advisability of such a course, and the old method of making a student attend lectures and pass examinations in the full range of subjects, and always in classics, mathematics, and physics, is relegated to its proper place. Old pass-men in universities covered a good deal of ground, but they did not acquire much. They only learned how to study; they only touched upon what they might study if they had time and inclination after graduation. Great as the struggle has been in regard to giving up the demand that students shall pass final examination in classics or mathematics, its wisdom cannot be doubted. Lectures and examinations in classics or mathematics, with one of another group, such as the modern languages, or physics, or mental and moral philosophy and history, are not only quite sufficient for the short career at a University, but there is thus freedom given to students to choose a course toward which, as the CHANCELLOR said, "their intellectual qualifications or prospective views in life may especially incline them."

There is no more important question in connection with the existence of a University than the relations of its graduates to it. There are few men who do not cherish a lasting and loving regard for their Alma Mater, but the connection is apt to grow less vital as years go on, owing to the infrequent occasions on which the loyalty and responsibility of members of the University are of necessity exercised. In most Universities the graduates only have a voice in elections to the Senate, and since the representation in this body is very limited, the immediate presence of any one member's influence seems a small thing. But, as the CHANCELLOR pointed out, there is an attempt being made to make Convocation

a greater working factor in the life of the University. The most serious of the requests made by the members to the Senate are that no new chair or lectureship be founded, or funds appropriated, without the consent of Convocation. The petition of course cannot be granted under the present constitution, and the only concession made is that the Senate will consider the reports of deliberations of meetings of Convocation at which the Chancellor or the Vice-Chancellor has presided. The move made thus by the members is a very democratic one, and involves a great change in the policy and working of the University. It is not altogether clear that the change, even if it could be accomplished, would be a wise one. One of two dangers must be met: the gradual decay of interest in the working of the University by old graduates, through limited means of exercising their influence, as under the present system; or a too great deliberative power, which would retard ordinary circumstances seem to retard University legislation rather than facilitate it, as would likely occur under the new plan. Much of the real power of the Senate would be gone under the proposed plan, and the Convocation would be in substance "the Assembly" of the University.

So far, the Women's College movement has not prospered. Sir WILLIAM MANNING did not speak very optimistically of it. In spite of the fact that there is every prospect of Parliamentary endowment, private contributions have come in but slowly; and there would appear to be little interest taken in providing that college accommodation which ought to have been coincident with the admission of females to academical privileges. If in the case of male students residence is a good and necessary thing, in the case of female students it is almost indispensable. It is hard to understand why the labour of those who have sought contributions has not met with greater reward. One cause of the lack of hearty response seems to be that in the quarters where sympathy would be most likely to be found it does not exist. The wealthy and the fashionable portion of society, who are generally expected to at least patronise such cultured movements, have withheld their hands and their purses save in a few cases. It is not, too, the higher "sets" of our colony that take advantage of the University training for girls, but the middle-class folk, who evidently place a larger value upon a sound collegiate education. In this respect our gentlemen differ from their English cousins. The CHANCELLOR seems no more hopeful of the University being able to establish a School of Law than he was last year. If anything he is more hopeless. An Act of Parliament stands in the way of the University giving diplomas which would give a right to practice, and the proposed amalgamation of the two branches of the legal profession makes the matter still more difficult. The whole subject is buried in complications, from which there does not seem a possibility of speedy extrication; and outside of all technical or legal difficulties there is still to be counted much opposition from members of the Bar, who do not readily give up legal traditions. There is one feature of the Commemoration which must not be overlooked. The first medical degree was conferred on Saturday. It is now but four years since the Medical College was established, and while the work in this department has gone on with every prospect of success, in the nature of things the first-fruits could only be visible when the years which make the course were completed. The degree taken was a good one, and it may be hoped that in a few years we shall not have to look to the old country for our medical men. The earliest proof of self-reliance and progress in a young country is the vigorous support and fostering care given to its educational and professional institutions.

The debate in committee upon the Land Bill on Thursday night was a serious debate, undisturbed by frolic or wrangling; but for the amount of work done the quantity of talk was prodigious. When it is considered that the whole time was occupied over the sub-sections of a single clause, it must be admitted that the rate of progress was not satisfactory. The discussion related chiefly to sub-section 8 of section 12, which empowered the Minister, he being of opinion that any determination by a Local Board was erroneous or improper, to refer it to the Land Court for consideration, after which the Land Court could remit it to the Local Land Board for the purpose of taking further evidence or reviewing its decision. The objects of these provisions are sufficiently intelligible and sufficiently commendable to justify some surprise at the length of the debate upon them, and also at its discursiveness. A glance a little way ahead should have shown that section 17 provides that any party to a proceeding before a Local Board may appeal from the decision of the board to the Land Court; and also that, unless notice of appeal be given within the prescribed time, the decision of the board shall be final. The sub-section debated so fully last week should, we think, be considered in connection with section 17. If parties to a dispute are entitled to an appeal from the board to the court, it is surely wise that the Crown should have a right to procure a re-hearing of a case which appears to have been decided in error or upon incomplete evidence. Wrongs will happen, and the Crown ought to have power when they are discovered to take measures for a remedy, even though there was no appeal within the prescribed time by the parties interested. The evidence of wrong might not have come to light before that time had expired; and again, the rights of the Crown might be affected. The proposal that the matter should be left to the Land Court was impracticable, because in the nature of the case what is wanted is the means of setting the Court in motion. The Court becomes cognisant of such cases only as are referred to it. This sub-section places no fresh power of determination in the hands of the Minister; it only authorises him to subject the decisions of the Boards to revision by the Land Court, or perhaps by themselves also. We are afraid that there is an unnecessary scare about the powers conferred upon the Minister, and if there should be legislation in a panic upon this point there will probably be more complications and confusion than there are already.

At the special general meeting of the Agricultural Society of New South Wales last week, a resolution was passed providing that

"any kindred district society may nominate one of its members to represent it who shall be an *ex officio* member of the council." This resolution will have to be formally embodied in the rules at a future meeting to be of force; but it is to be hoped that there will be no difficulty upon that point. The proposed change is sound in policy. Nothing is more desirable for the promotion of the purposes which both the Metropolitan Society and the country societies have in view than cordial co-operation between them, and to obtain that, the admission of the country societies to a share in the management is an excellent expedient. The exhibits must come from the country, but it is in the metropolitan district where the population is to be found that will provide large attendances and make the show a financial success. There should be no conflict of interest between the provincial and metropolitan associations. They are all, in the main, working for one common cause, and that will be best served by their working unitedly. Under an efficient system of co-operation the holding of a really good central Exhibition, which the largest prizes would be offered and the keenest competition would take place, should stimulate rather than diminish the interest in the local exhibitions, because the contests in the latter would supply a preparation for the final and sharper tests at the former. Decentralisation may have a healthy influence in some cases, but it should not be forgotten that centres have their uses which it would be folly to overlook. A central competition, at which prize-winners at local competitions may compete with each other for higher prizes, may exercise an influence which could not otherwise be attained. We are glad to learn that steps have been taken to strengthen the position of the Association in the matter of charging for admission to the show grounds. Unless doubts upon that point are cleared up satisfactorily, the association may almost as well discontinue its operations. Those operations are conducted for a public purpose. But, although they are partially supported by public money, they cannot be made successful unless those who conduct them in the interests of the public are armed with all necessary powers. It is absurd to say that the public generally will suffer any real loss of right or privilege through such a concession; but there would be a substantial loss to the public if the holding of the shows were rendered impossible.

NEWS OF THE DAY.

The English mails per P. and O. Company's steamer Oceana, dated London, 10th March, will be due to-morrow (Tuesday) in time for delivery at about 2 p.m.

A TELEGRAM was received on Saturday morning from the Secretary of State for the Colonies in acknowledgment of the cable message in reference to Chinese immigration, transmitted to the Imperial Government by his Excellency Lord Carrington on the 31st ultimo. The message states that the minute of the Government of this colony on the Chinese question was under consideration.

The annual commemoration of benefactors of the University of Sydney was held in the great hall on Saturday afternoon, and was attended by a distinguished assembly of ladies and gentlemen. His Excellency the Governor and Lady Carrington were present, and the proceedings were carried out with much enthusiasm. Sir William Manning (the Chancellor) delivered an address which dealt with changes in the arts curriculum, affiliated colleges for women, contemplated new branches of instruction, and other subjects. The Governor also gave an address, which dealt principally with the measures adopted by the colonies to secure a restriction of any influx of Chinese.

MR. G. W. GUYVER, United States Consul at Sydney, is sending to the Department of State at Washington, by the outgoing mail steamer, a valuable collection of minerals, &c., illustrative of the wealth of the colony in this respect. The collection comprises auriferous quartz, silver, copper, and tin ore, and various kinds of gemstones, &c. The specimens will be accompanied by a report dealing with the subject of mineralogy in New South Wales, for the information of the United States Government. Mr. Griffin has been collecting these specimens for over seven months, and has obtained a number of fine specimens of minerals, &c. and elsewhere through the assistance of the Minister for Public Instruction (Hon. J. Inglis), the secretary of the Museum (Mr. Sinclair), and Mr. J. H. Maiden, Curator of the Technological Museum. The specimens will be eventually exhibited at the Smithsonian Institution at Washington.

The Royal Commission, representing the Australian colonies, appointed to inquire "as to whether introduction of disease amongst rabbits, by inoculation or otherwise, or the propagation of diseases natural to rabbits, for the purpose of destroying or promoting destruction would be accompanied by danger to human or animal life," will meet to-day at the Colonial Secretary's office. The commission consists of Mr. McCulloch, Mr. Macdonald, M.L.A., and Mr. Edward Quinn, New South Wales; Dr. H. B. Allen, Mr. E. H. Lancelotti, and Dr. A. N. Pearson, Victoria; Dr. E. C. Stirling, and Mr. A. S. Patterson, South Australia; Dr. Bancroft, Queensland; Mr. Thos. A. Tabbart, Tasmania. It is understood that to-day's meeting will be of a preliminary character, and will be devoted mainly to arranging the order of business.

TAKING advantage of the visit to Sydney of the members of the Melbourne Liedertafel, Mr. J. A. Delany, the conductor of St. Mary's Cathedral choir, made arrangements for a special musical service yesterday. Haydn's third Mass, better known as "The Imperial," was the work selected, and the ordinary choir of St. Mary's, and the Liedertafel, assisted by some thirty of the representatives of the Melbourne musical associations. As might be expected, a more than usually effective performance of the work was given with the powerful chorus of over 60 voices. In addition to assisting in the Mass, the visitors, just before the Gospel, sang with much melody the beautiful Italian hymn "O Sanctissima," which is a favourite item in the repertoire of both the Sydney and Melbourne Liedertafels, and at the close of the service, Mr. Staker, of Melbourne, gave a spirited rendering of the solo part in the brilliant and joyful "Landsturm," by Zingarelli, the sweet voice of the tenor showing out in fine contrast with the massive chorus and the pealing organ. Mr. Delany conducted the music throughout, and Mr. T. P. Banks occupied his accustomed place as organist.

The Paddington Rifle Range was reopened for practice on Saturday afternoon. All trace of the recent encampment has practically disappeared, and the range presents its usual aspect. A number of club matches and practice were being going on after noon, and the targets were fully occupied. At the Sydney Rifle Club targets some trials were made with the Colt's Lightning Repeater, a comparatively new form of magazine rifle which has attracted considerable attention in connection with the general arming with magazine rifles, and also in view of the proposed mooted infantry reorganisation in this colony. The weapon was tested by experienced marksmen, and up to 600 yards, in a high wind, and the results were most satisfactory. The magazine and chamber together carry a supply of 15 rounds, which can be fired in ten seconds or less; and the rifle possesses the special power of retaining the magazine in reserve and firing shot by shot; and practice was being going on after noon, and the targets were fully occupied. At the Sydney Rifle Club targets some trials were made with the Colt's Lightning Repeater, a comparatively new form of magazine rifle which has attracted considerable attention in connection with the general arming with magazine rifles, and also in view of the proposed mooted infantry reorganisation in this colony. At the Sydney Rifle Club targets some trials were made with the Colt's Lightning Repeater, a comparatively new form of magazine rifle which has attracted considerable attention in connection with the general arming with magazine rifles, and also in view of the proposed mooted infantry reorganisation in this colony. The weapon was tested by experienced marksmen, and up to 600 yards, in a high wind, and the results were most satisfactory. The magazine and chamber together carry a supply of 15 rounds, which can be fired in ten seconds or less; and the rifle possesses the special power of retaining the magazine in reserve and firing shot by shot; and practice was being going on after noon, and the targets were fully occupied. At the Sydney Rifle Club targets some trials were made with the Colt's Lightning Repeater, a comparatively new form of magazine rifle which has attracted considerable attention in connection with the general arming with magazine rifles, and also in view of the proposed mooted infantry reorganisation in this colony. The weapon was tested by experienced marksmen, and up to 600

to a depth of 48ft., of which 22ft. is timbered up. The shaft on Block 46 is now 43ft. deep. The western crosscut

has been driven off, and the eastern one left. South of the
eastern track a drive has been made at right angles to it,
and the road is now being graded. The distance from the
shaft in Block 49 has been driven 22 ft., and is now 44 ft.
in length, but with no change in the ground. More will be
put to cover the shaft, and the road will be widened to
the width of the shaft, and a few more will shortly be put on.

The Golden Gulch Gold-mining Company, Limited,
April 10.—In breaking down stone from two reefs several
feet below the surface of the water, we have found a large
gold vein, having cut some mineral lead between the two reefs,
which I think will turn out very rich.

Cordillera Extended Company, Tucua.—Captain Breen,
of the United States Army, arrived from Maricao National
Reserve, San Juan, P. R., this morning. There is a very strong local legend
speaking out on this claim.

Lucky Hit Silver-mining Syndicate, Silverton, March 28.
The mine was worked all day last night. We have small signs
of fortune occasionally in the shaft, but I may say that
there is actually no change, nor do I expect any until we
start the creosote. The country is getting drier, and the
water level is dropping. It is expected to open up soon.
I expect two more men soon, when I shall be able to push
the work ahead. I consider the limestone in this property
very valuable.

Pacifico Alexandria Ironbricks.—This is the most
advanced mine on the field, the proprietors having
so far proved their ground that they are deemed eligible
to take part in the lottery. The mine is owned by
under the management of Mr. Joseph Nicholson. The
battery, which was recently at Mitchell's Creek (Rouse-
au and Co.'s), is being erected. 2600 yards of dirt have been
excavated, and the machinery is being moved to the new
place for tailings and the storage of water. The machine
used is being erected by contract. Only four hands are at
the mine, the work being well ahead of requirements. A
large quantity of material is being stored in great quan-
tity below Mr. Nicholson and another have been doing
the mine in for over seven years. Their labors have
shown that the mine is capable of producing a large
quantity of iron ore, and it is expected to be a very
important mine in the future. The work is about
12 ft., thick, and gold is often visible. There are three
shafts, 40 ft., 60 ft., and 100 ft. deep, all connected under
the same level. The water level is about 10 ft. above
water per 24 hours, but the pumps can take it out in a
few minutes. The main shaft is timbered and fitted with winding

and pumping gear. The trickiest road is connected with the haulage in the mine. The plying qualities of the stone will soon be proved.

MELBOURNE, SATURDAY.
Share Report.—Sales: Block 14, £10 10s., £10 5s.; Junctions, £5 10s., £5 10s.; Central British Hill, Extended, 25s. 6d.; Central British Hill, £5; Concorros, 16s. 6d.; British Broken, £5, £5 5s.; North Broken, 20s.; Rising Sun, 27s., 26s. 9d.; Round Hill, £6 17s. 6d.; Victoria Mine, 25s.; Madams Bay, 10s.; Long Tunnel, £54.

There was an active Share Market on Saturday. The market opened steady but closed somewhat higher. There is little change in gold companies. Mount Morgan sold to good extent at the late advance. Long Tunnel Extended, which opened a little easier, firm towards the close. In £10 10s., Junctions, £10 10s., to £5 10s.; British Hill Extended, 25s. 6d.; Central British Hill, £5; Concorros, 16s. 6d.; British Broken, £5, £5 5s.; North Broken, 20s.; Rising Sun, 27s., 26s. 9d.; Round Hill, £6 17s. 6d.; Victoria Mine, 25s.; Madams Bay, 10s.; Long Tunnel, £54.

AUCKLAND, SATURDAY.
Share Report.—Sales: Broken, cun. dividends, £363 10s.; Block 14, £10 10s., to £11 5s.; South, paid, £9 2s., to £8 10s.; Junctions, £5 10s., to £5 10s.; British Hill Extended, 25s. 6d.; Central, paid, £10 10s., £5 9s.; New North, £3 1s. 6d. to £3 1s.; Unbornbarers, contributing, £1 12s. 6d., to £1 1s. 6d.; King, £1 2s. 6d., to £1 2s. 6d.; Round Hill, £6 17s. 6d., to £6 17s. 6d.; to £12s. 6d.; Lead, £1 2s. 6d., to £1 2s.; Bonanza, 18s. 9d.; Eveleas, paid, 9s. 3d.; Extended, No. 1, 8s. 7d., to 8s. 6d.; Lead, £1 2s. 6d., to £1 2s. 6d.; Victoria Mine, £25; Euriowie, £12 5s. 6d., to £1 2s.; Victory Tin (contributing), £2 10s.; Baker's Creek, £5; Mount Carmichael, 7s.; Teanauhi Silver King (respecting Association), £30; South Island, £4.

AUCKLAND, SATURDAY.
It is reported here that Mr. W. K. Wilson, who recently concluded the purchase of the New Field and Silver King mines in the T. A. Ashcroft & Co. deal, has been privately floating the T. A. Ashcroft Gold-mining Company in Australia with a capital of £200,000.

HOURS, SATURDAY.

Reports are handed to-day by the coroner, provided and equipped by a Bourke agricultural suit went in to the principals that they have struck rich gold. The exact locality is unknown, but it is about 60 miles south from the place where the body was found, and the men leaving town to-day to inspect the find. No further reports are available as yet to the reported rich find near New River.

GRAPTON, SATURDAY.

An application for the suspension of work for six months has been made to the Board of Directors of the Nana Creek, has been granted by the wardens.

TENA, SATURDAY.

The population is rapidly increasing at Cordillera. There are fully 300 persons on the ground, and the population is up all directions. It is expected that a smelter will be set to work in ten or twelve days. Workmen have great quantities of silver ore, and the quality is good. At Tena there are now branches of the London Chartered Bank and Bank of the South Wales estate. The population is number by about hundred. The population now being 200. There are two stores and an hotel. The mines in the neighbourhood are looking promising just now. The reason for this is that the mines are very rich in silver and lead. Accommodation at the warden's office and the post and telegraph office is inadequate. The whole of the country is a patient battery, and the rain is badly wanted. Pasture is drying up, and stock are falling off in condition.

WEST MAITLAND, SUNDAY.

T. Moore, well-known in Maitland, has just returned from Stewart's brooks diggings, and gives a very favourable account of the field. J. G. Small has erected one of the best of the patent batteries, and the machine has been put through the machine. Six and three-quarter tons from

Moore and party's claim yielded 20 tons, of returned gold, and the party was allowed to leave the whole of the mine exhibiting at the forthcoming show of the Hunter River Agricultural Association. He also states that the party will be in the city on their way to a Sydney syndicate, is very likely to change hands.

DUBBO ASSIZE COURT.

[BY TELEGRAPH.]

(FROM OUR OWN CORRESPONDENT.)

DUBBO, SATURDAY.

The assizes are not yet concluded. On Friday the Court sat all day, and up till half-past 10 on Thursday morning, and the trial of the whole of the cases of juries and witnesses being kept in attendance till that hour. James Veitch, manager of the Goodridge mine, near Wellington, was charged with the murder of a man named Snow, by neglecting to protect his mine in a proper manner. A quantity of rock fell on a stage, breaking the back, and falling into the mine, and the death of a man being at a forge. The unfortunate man was pinned by one of the falling pieces of the stage on to the fire in the forge, so that the greater part of his body was roasted before he could get out. Death was instantaneous the prisoner. Mr. Sles, the Government inspector of mines, proved to having given prisoner notice to protect the dangerous mine, and that the prisoner neglected his duty. The prisoner was found guilty, and was remanded for sentence. John O'Brien was charged with having committed an assault on an old woman living on the river at Dubbo. The prisoner was undefended. The jury found a verdict of not guilty. In discussing the jury his Honor said to the prisoner—"You are one of the few who have been found not guilty. You are not yourself very fortunate."

verdict, the foreman informed Mr. A. McCallan, the attorney for the jury, said he was satisfied by his long time information that the verdict was correct. The jury returned their remarks about their verdict deeply, and that the verdict was a conscientious one. His Honor replied that he had no objection to the jury's verdict.

Charles Cooper Christianson, of Giraltonholm, a selector and sheep farmer, was charged with stealing sheep, the amount of which was not stated. He was sentenced to five years. The Court was continued at 9 a.m.

The next day a charge of forgery against Francis Gilroy, Mr. Buchanan, who defrauded, produced a telegram stating that an important witness had been called away by a family emergency, and that his Honor finding that the distance was 42 miles, he consented to take the rest of the prisoner's evidence on affidavit. The witness was called, and gave the witness if he should come. At the conclusion of counsel's address, the witness not having arrived, the judge asked the witness to go back to get the witness and bring him direct to the court without letting him have any communication with anyone. The witness did not appear, but could not give any material evidence. His Honor then adjourned the case until the next day.

John Flinn, of Nyanam, butcher, charged with cattle stealing, was defended by Mr. Charles Cooper Christianson. The prisoner was sentenced to 18 months of reformatory. The prisoner was sentenced to 10 years on the roads. The Court was adjourned after midday.

In charging the jury, who retired, and were absent from 10.30 a.m. to 4.30 p.m., when they returned with a verdict of guilty, His Honor told them that the prisoner had been three years' hard labour in Dubbo goal. James Veitch, for manager, received six months' hard labour in

duro goal. With zeal and for not receiving, received three years in Dubbo goal. Wm. Coulter, a youth, pleaded guilty to a charge of larceny, and received four months hard labour in Dubbo goal. In the case of assault with intent to commit a murder the jury have been locked up till Monday morning.

IMPORTANT NOTICE TO THE PUBLIC.—On all weakness of the stomach, which is the foundation of almost every disease known to man, we call attention to Row's Dandelion Bitters as a preventive. If timely use be made of them they will prevent all the horrors of indigestion. Try them. All chemists.—[Adv.]
